Past index performance is not indicative of future results.

The potential to build cash value in the Indexed Account is based on the performance of the S&P 500® Index on an annual point to point basis using a participation rate, index growth floor, and index growth cap. Please see the policy prospectus for further details about the S&P 500 Indexed Account.

Participation Rate: The Participation Rate is the percent of the gain (if any) in the Index Value that is used to calculate the Index Growth Rate subject to the Index Growth Floor and Index Growth Cap. Participation Rates for new index segments may change, but they will never be lower than the guaranteed minimum Participation Rate of 100% as stated in the policy. Once an index segment is created, its Participation Rate will not change.

Index Growth Floor: The Index Growth Floor is the minimum rate of interest that will be applied to a particular index segment. Index Growth Floors for new index segments may change, but they will never be lower than the guaranteed minimum Index Growth Floor of 1.00% as stated in the policy. Once an index segment is created, its Index Growth Floor will not change.

Index Growth Cap: The Index Growth Cap is the maximum rate of interest that can be credited on a particular index segment. The current growth cap rate for an index segment is determined in advance. It may be raised or lowered before the segment is created, but it will not be lower than the guaranteed minimum Index Growth Cap of 3% as stated in the policy. Once an index segment is created, its Index Growth Cap will not change.
